

CLAIMS

What is claimed is:

1. A shower screen shield, including a shower curtain made of a solid color fabric, and a plurality of hanging rings equidistantly attached at the top side of the shower curtain thereon to be sequentially led through a hanging rod for location of the shower curtain thereby; the present invention being characterized by that,

—both the front and the rear sides of the shower curtain being coated with a layer of waterproof basic color respectively wherein the front waterproof basic color being preset with a plurality of invisible or hidden diagram areas which are both water-absorbing and figured with diagrams of various designs;

—thus, when the shower curtain is in contact with hot steam or water in a bathroom, the hidden diagram areas thereof will absorb the water or moisture pervading in the air and the hidden diagrams thereof will be gradually revealed in different shades, providing a fresh and appealing visual effect in bathing so as to improve the quality of daily life as well as to attract the curiosity of children and make bathing more interesting to them.

2. The shower screen shield as claimed in Claim 1 wherein both the front and rear water-proof basic colors of the shower curtain thereof can also be preset with a plurality of front and rear invisible or hidden diagram areas respectively which are both water-absorbing and figured with diagrams of various designs wherein the front and rear hidden diagram areas thereof are arranged in an alternative manner.
